

Write the program that prompts the user for a **list** of numbers and prints out the maximum and minimum of the numbers at the end when the user enters "**done**". Write the program to store the numbers the user enters in a list and use the `max()` and `min()` functions to compute the maximum and minimum numbers after the loop completes.

Note : using list or dictionary

```
Enter a number: 6
Enter a number: 2
Enter a number: 9
Enter a number: 3
Enter a number: 5
Enter a number: done
Maximum: 9.0
Minimum: 2.0
```
